K-SOL 12-6-36 + ME

IMPROVES FRUIT TEXTURE PROMOTES RIPENING

The K-SOL LINE consists of a wide range of highly soluble fertilizers with a large variety of macronutrients ratios, to best meet individual crop requirements and production expectations. The microelements, present in a totally chelated form, help prevent and treat any physiological plant disorder associated to their deficiency. The K-SOL LINE is suitable for any fertigation system.

K-SOL 12-6-36 + ME is the fertilizer of the K-SOL LINE characterized by a macroelements (NPK) ratio shifted towards potassium. This makes it suitable for applications during the final phase of the crop cycle, to improve fruit texture and promote the ripening process.

CROP	TIME OF APPLICATION	DOSE/HECTARE*
All crops	Ripening inducer	25-50 kg

COMPOSITION	
Total nitrogen (N)	
Ammoniacal nitrogen (N)	
Ureic nitrogen (N)	
Phosphoric anhydride (P ₂ O ₅) soluble in water	
Phosphoric anhydride (P_2O_5) soluble in neutral ammonium citrate and in water	
Potassium oxide (K ₂ 0) soluble in water	
Magnesium oxide (MgO) soluble in water	
Sulfuric anhydride (SO₃) soluble in water	
Boron (B) soluble in water	
Copper (Cu) soluble in water	
Copper (Cu) chelated by EDTA	
Iron (Fe) soluble in water	
Iron (Fe) chelated by EDTA	
Manganese (Mn) soluble in water	
Manganese (Mn) chelated by EDTA	
Molybdenum (Mo) soluble in water	
Zinc (Zn) soluble in water	
Zinc (Zn) chelated by EDTA	

PHYSICO-CHEMICAL FEATURES		
SOLUBLE POWDER		
pH (sol 1%)	4.64	
Conductivity E.C. S/cm (1‰)	1565	
METHOD OF USE	7447	
	Fertigation	

PACKAGING: 25 KG - PALLET 1500 KG, BIG BAG 600 KG
