

FILL NPK 21-21-21

BALANCED NUTRITION THROUGHOUT THE CROP CYCLE

The FILL line is a range of soluble powder products for foliar applications. The FILL LINE products are characterized by excellent solubility and include ternary (NPK) fertilisers with various combinations of nutrients to meet the needs of all crops in all phenological phases.

FILL NPK 21-21-21 is a fertilizer of the FILL LINE characterized by a balanced ratio between nitrogen, phosphorus and potassium (1:1:1). It is ideal for treating all the crops and throughout the whole productive cycle.
