

K-SOL 25-10-5 + ME

STIMULATES A VIGOROUS PLANT DEVELOPMENT PROMOTES PLANT GROWTH

The K-SOL LINE consists of a wide range of highly soluble fertilizers with a large variety of macronutrients ratios, to best meet individual crop requirements and production expectations. The microelements, present in a totally chelated form, help prevent and treat any physiological plant disorder associated to their deficiency. The K-SOL LINE is suitable for any fertigation system.

K-SOL 25-10-5 + ME is the fertilizer of the K-SOL LINE with a high nitrogen content, suitable for applications in the phenological phases of greatest need for the element, such as vegetative restart, pre-flowering and whenever the crop shows growth interruptions. Suitable for all crops.
