

BULL NPK 14-7-7

STIMULATES A VIGOROUS PLANT DEVELOPMENT

The BULL LINE is a range of highly-soluble liquid fertilizers, made of products with particular formulations that have been studied to perform in soils with very different pH levels. The BULL LINE includes both simple liquid fertilizers, in which there is only one macro-element to best dose the nutritional inputs according to the crop requirements, and complex liquid fertilizers, characterized by excellent stability and extreme ease of use.

BULL NPK 14-7-7 is a liquid fertilizer of the BULL LINE suitable for all crops, in particular to stimulate the vegetative restart after the winter rest or after the occurrence of adverse climatic phenomena. The balanced ratio among nutritional elements, a good nitrogen content, the presence of iron in chelated form and boron, make BULL NPK 14-7-7 particularly suitable when physiological plant disorders are highlighted, especially on olive, peach, cherry, almond, grapes and horticultural crops. BULL NPK 14-7-7 also favors a prompt crop vegetative recovery, especially when parasitic attacks or adverse conditions alter their normal functions (hail, frost, growth interruptions due to herbicides or pesticides, etc.). The nutritional elements (NPK) contain neither chlorides, nor sulfates, nor carbonates.

CROP	TIME OF APPLICATION	DOSE/HECTARE*
All crops	Vegetative phase	25-30 kg

COMPOSITION	
Total nitrogen (N)	14%
Ureic nitrogen (N)	14%
Phosphoric anhydride (P ₂ O ₅) soluble in water	7%
Phosphoric anhydride (P ₂ O ₅) soluble in neutral ammonium citrate and in water	7%
Potassium oxide (K ₂ O) soluble in water	7%
Boron (B) soluble in water	0.10%
Iron (Fe) soluble in water	0.30%
Iron (Fe) chelated by EDTA	0.30%

PHYSICO-CHEMICAL FEATURES	
LIQUID	
pH (sol 1%)	8.18
Conductivity E.C. S/cm (1‰)	520
Density (g/cm ³)/Specific weight	1.25
METHOD OF USE	
	Fertigation

PACKAGING: 20 KG
