

PREVENTS PHYSIOLOGICAL PLANT DISORDERS RELATED TO CALCIUM/MAGNESIUM DEFICIENCY
IMPROVES FRUIT TEXTURE AND PROLONGS SHELF-LIFE
IMPROVES PHOTOSYNTHETIC EFFICIENCY

IDROCAL Mg is a calcium and magnesium salts' complex with low-molecular-weight organic acids. The product is a liquid formulation with a curative and a preventative activity on physiological plant disorders associated to the scarce availability of those two meso-elements. The organic acids contained therein stimulate root production and, at the same time, they give the "root capillice" a better adaptability to high salinity levels.
