

K-SOL NITROCAL GG GR

STIMULATES A VIGOROUS PLANT DEVELOPMENT PREVENTS AND TREATS CALCIUM DEFICIENCY INCREASES TISSUE MECHANICAL RESISTANCE

The K-SOL LINE consists of a wide range of highly soluble fertilizers with a large variety of macronutrients ratios, to best meet individual crop requirements and production expectations. The microelements, present in a totally chelated form, help prevent and treat any physiological plant disorder associated to their deficiency. The K-SOL LINE is suitable for any fertigation system.

K-SOL NITROCAL GG GR is a nitrogen mineral fertilizer of the K-SOL LINE, highly soluble in water, with ready effect. The nitrogen, available in nitric form, is easily absorbed by the root system. This allows a prompt recovery from deficiencies related to adverse climatic conditions or nutritional deficiencies, even during the most critical phases of the crop cycle. Calcium nitrate triggers a rapid plant vegetative response. It is ideal for applications at vegetative restart, pre-flowering and whenever the crop shows growth interruptions. K-SOL NITROCAL GG GR can be mixed with all other soluble fertilizers, with the exception of fertilizers containing phosphorus and sulfate.

CROP	TIME OF APPLICATION	DOSE/HECTARE*
All crops	Vegetative phase	25-50 kg

COMPOSITION	
Total nitrogen (N)	15.20%
Nitric nitrogen (N)	14.00%
Ammoniacal nitrogen (N)	1.20%
Calcium oxide (CaO) soluble in water	26.60%

PHYSICO-CHEMICAL FEATURES	
SOLUBLE POWDER	
pH (sol 1%)	6.30
Conductivity E.C. S/cm (1‰)	950
METHOD OF USE	
	Fertigation

PACKAGING: 25 KG - PALLET 1500 KG

The choice of the dose is subordinated to various factors and can be varied when necessary. All applications can be repeated in relation to the different crop needs. You can contact our Technical Service for the correct application on specific soils and under specific climate conditions.}
